

Join the Behavioral Health Workforce Education & Training Program!

The BHWET program presents a unique opportunity to work with disciplines outside of Social Work with the aim of increasing the comprehensiveness of patient care, especially in medically underserved communities. Students involved in the program will gain a wealth of knowledge not only through their social work practice but also through working with other practitioners in the physical health fields as well as interdisciplinary trainings.

For this year's cohort we will be accepting 18-20 students in their Advanced Year/final year in the MSW program. Ideal candidates for this program will have a passion for working in the behavioral health field (particularly in underserved communities) and have a strong interest in working in an integrated healthcare setting in the future.

Placement sites for this year have not yet been finalized, but may include: Children's Hospital of Michigan, Southwest Solutions, and Henry Ford Hospital, DWIHN, and many more.

Please note- interviewing at one of the field sites does NOT guarantee a spot in the program as field sites will be making the final decision regarding students accepted into the program. Additionally, placement at one of the partner sites does not guarantee a spot in the program as many field sites will have spots for students that are in the BHWET program as well as regular field sites (for example: Children's Hospital may be looking to place 15 students for field, however only 4 of those may be with the BHWET program).

Tuition stipends available, spots are limited.

**Contact Kristi Price at fk7354@wayne.edu
for more information.**

Be sure to indicate your interest when you fill out the IPT!

Note: participating agencies will make final decision regarding students accepted into the program. Information regarding program acceptance will be sent out in July/August 2020
