

**Consumer and Clinician Perspectives on the Treatment of OCD among People with Lived Experience of OCD Symptoms with a History of Trauma Exposure**

**IRB-23-10-6223**

***Have you experienced past or current symptoms of OCD and been exposed to at least one traumatic event?***

*If so, you may be interested in this research study aimed at better understanding the relationship between OCD, trauma and mental health treatment.*

**We are conducting a research study to better understand:**

- 1) perspectives and treatment experiences of people with lived experience of OCD who have a history of trauma exposure
- 2) the relationship between dissociative symptoms and OCD
- 3) the relationship between different types of trauma exposures and specific types of OCD

***What does participation look like?***

Your participation in this study involves a one-time completion of an online survey assessing OCD symptoms, trauma history and your treatment experiences that will take about 20-40 minutes of your time.

Participants who complete this survey will be entered into a lottery for a drawing for gift card incentives valued at \$30.

If you are interested, please use the QR code or link below for a brief pre-screening survey to determine if you are eligible for the study. If eligible, you will be taken directly to the survey to complete it. Thank you for your time!
